Work Experience

Mobile Applications Developer, May 2013 to present
City of Elgin, Elgin, IL

- Published **Case Router**, a universal iOS navigation app that allows employees using Salesforce to manage case records and track them on an interactive map
- Developing a universal iOS app through which citizens can interface with a Salesforce community
- Created Salesforce APIs that establish public access points for requesting 311 case records and Knowledge Base articles
- Developed Apex triggers, basic Visualforce pages, and unit tests and deployed them to a production Salesforce server

Mobile Applications Developer, May 2014 to August 2014
Fermilab, Batavia, IL

- Developed both an iPhone and Android application to act as a safety reference guide for employees across the Fermilab campus
- Designed an API utilized by the mobile applications to provide current safety hazard information in various buildings
- Managed an employee who provided development assistance for web integrations
